# How to Remove Bundle from Fiber-optic Retractors

**Allen Wrench**
Turn LEFT to remove
Turn RIGHT to tighten
(do not over tighten)
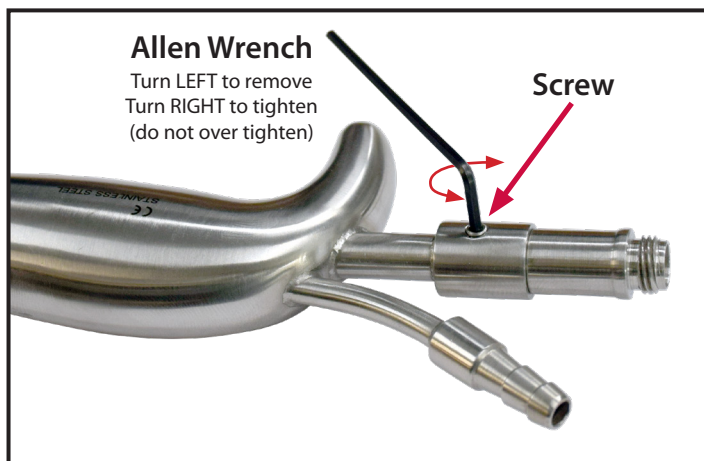

**Screw**

## Step 1

- Locate the retaining screw on the bundle. Using the supplied Allen Wrench, loosen the screw by turning it left.
  *NOTE: Screw only needs to be loosened and not completely removed.*

- To reattach bundle, tighten the screw by turning it right with the Allen Wrench*.
*WARNING: Do not over tighten the screw.*

**Retaining Clamp**
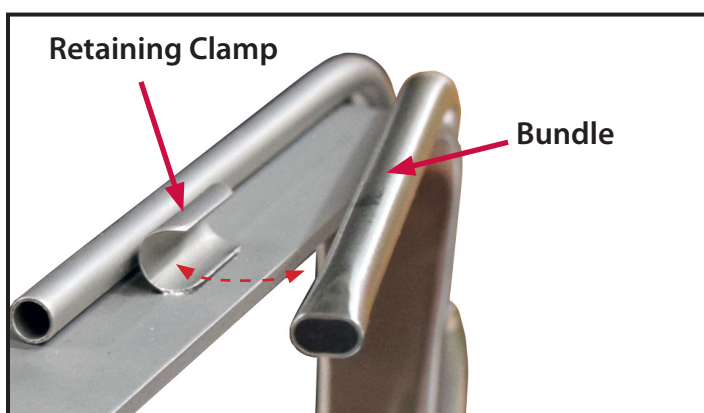

**Bundle**

## Step 2

- Gently unclasp bundle from the retaining clamp on the top of the fiber-optic retractor blade.

- To reattach, slide bundle into clasp located on the top of the fiber-optic retractor blade.
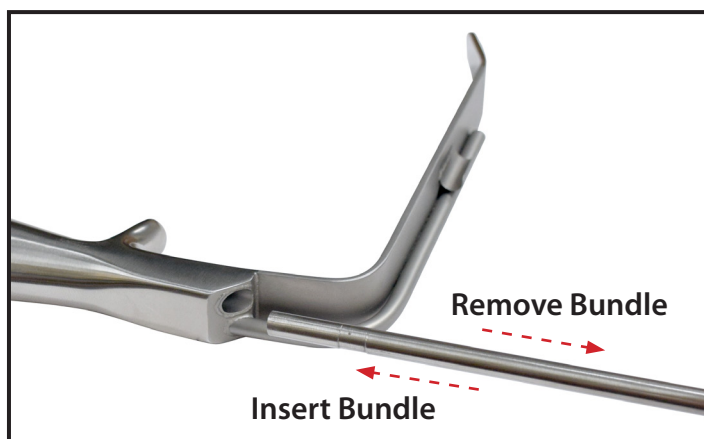

## Step 3

- Bundle can now easily be removed.

- When ready, reinsert bundle back into the fiber-optic retractor.

**Remove Bundle**

**Insert Bundle**

## To Reattach Bundle Simply Perform Steps 1 to 3 in Reverse

Please call 800-428-1610 if you have any questions or issues
removing and reinsert the fiber-optic bundle.
